

Team Lead / Development Manager (Full Stack)

Limelight is looking for a talented and motivated individual to join the team as a **Team Lead / Software Development Manager** to help us to continue to develop our industry leading experience marketing application. This individual will be joining a dynamic team of energetic and intelligent individuals focused on delivering innovative solutions for a wide range of exciting customers from a multitude of industries.

If you've got that spark and want to be a part of a dynamic team building something great, we look forward to hearing from you!

What You'll be Responsible For

You will be leading a development team (developers and QA) leveraging your experience to ensure the team runs smoothly. Working closely with the product manager, you will be estimating, prioritizing, and refining features requirements / bug fixes / tech debts, reducing the noise for your team so they can focus on what they do best. You will also be working hands-on to build & maintain the application.

What You'll be Bringing to The Team

- Solid experience in full-stack development to build enterprise SaaS applications built on back-end Java (with Spring framework) and SQL database and front-end on Angular (with TypeScript) hosted in AWS.
- Experience leading & managing a team of developers and QA through successful agile project deliveries
- Familiarity with mobile app development in iOS (Swift)
- Cross-functional collaboration with Product, Sales/Account, and Customer Success teams to ensure alignment, prioritization, and delivery of client satisfaction.

Your Skills

- Hands-on full-stack development in Java and Angular (TypeScript)
- Working knowledge of AWS (EC2, RDS, Beanstalk, Lambda, RDS/Aurora, CloudFront, etc)
- Strong computer science fundamentals, preferably a degree in Computer Science or similar
- Team leadership & people management skills.
- Project management and communication skills to bridge the gap between technical & non-technical audiences, ability to prioritize tasks according to business importance in working with multiple stakeholders at the same time.
- Familiar with common development frameworks / tools (eg. Jenkins, maven, Git, etc)
- Ability to debug, trace back on issues, discover the root cause, and offer potential solutions

- Experience in a start-up environment, you thrive in uncertainties and changing priorities with the ability to focus & prioritize
- Always up for a challenge, picking up new things, not afraid to ask questions, and continuously learning

Our Tech Stack

Our platform: Java-based application (Java 11), with Spring Framework (Spring 5) and supporting Spring Boot-based microservices (Spring Boot 2) with Docker. We use PostgreSQL as our database. On the front-end, our legacy application is built with JSP, jQuery, and AngularJS - while our new portal UI is built with Angular 6, RxJS, NGXS, D3.js, SCSS.

Our iPad/iPhone & Apple TV: Native iOS & tvOS App built on Swift 5+ and using Realm for data persistence. We use Bitrise as our CI tool and Fabric (Crashlytics) + Firebase as our analytics/monitoring tool.

We are using AWS as our hosting infrastructure. The platform can be built, tested, and deployed with a single click through Jenkins. While we got the "CI" (Continuous Integration) part down, we are still in the process of building our full automation test suite to get to the "CD" (Continuous Delivery) part.

Our Culture

At Limelight, we strive to make everyday a fun, valuable work experience, where team members are encouraged, supported, and given the chance to do work that is meaningful to them. We have all the perks, sure, but the big thing at Limelight is very simple: we treat each and every team member the way we want to be treated. That means you own your career, and your earning potential is limitless. As a company, we believe in giving you a work experience that you enjoy, that you excel at, and that you can balance with the rest of your life.

Limelight has a vibrant, highly engaged culture that has continued even as we work remotely during these difficult times. While the in-office perks have been temporarily put on hold, our culture of innovation, teamwork, balance and diversity continues as strong as ever.

About Limelight

Limelight's technology and team turn branded experiences into the results brands and agencies need. We partner with some of the world's leading brands to create amazing consumer experiences and dramatically better results, all backed by data and analytics.
